

Seven Hopeful Books About Climate Change

“Electrify: An Optimist’s Playbook” by Saul Griffith. An optimistic--but realistic and feasible--action plan for fighting climate change while creating new jobs and a healthier environment: electrify everything.

“All We Can Save: Truth, Courage, and Solutions for the Climate Crisis” edited by Ayana Elizabeth Johnson and Katharine K. Wilkinson. All We Can Save illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race.

“Under the Sky We Make: How to Be Human in a Warming World” by Kimberly Nicholas, PhD. Saving ourselves from climate apocalypse will require radical shifts within each of us, to effect real change in our society and culture. But it can be done. It requires belief in our own agency and value, alongside a deep understanding that no one will ever hand us power--we're going to have to seize it for ourselves.

“Climate Courage: How Tackling Climate Change Can Build Community, Transform the Economy, and Bridge the Political Divide in America” by Andreas Karelis. We have all the tools we need to solve the climate crisis and doing so will improve our lives, our economy, and our society. But to engage people in the climate fight, we need stories that are empowering, inclusive, and solutions-oriented, not based in fear.

“Nature’s Best Hope: A New Approach to Conservation That Starts in Your Yard” by Douglas W. Tallamy. If you’re concerned about doing something good for the environment, Nature’s Best Hope is the blueprint you need. By acting now, you can help preserve our precious wildlife—and the planet—for future generations. Nature’s Best Hope shows how homeowners everywhere can turn their yards into conservation corridors that provide wildlife habitats.

“How To Avoid A Climate Disaster: The Solutions We Have and the Breakthroughs We Need” by Bill Gates. All potential solutions need to be considered.

“Drawdown: The Most Comprehensive Plan Ever Proposed to Reverse Global Warming” by Paul Hawken. Educating women globally is a large part of the solution.
